

Memory Maps - Functions #1

```
def func1(s):  
    s = s.lower()  
    print("Inside function s =", s)  
  
s = "PYTHON" ←  
func1(s)  
print("Outside function s =", s)
```

Inside function s = "python"
Outside function S = "PYTHON"

Memory Maps - Functions #2

```
def func2(lst):  
    lst.append(100)  
    lst = [3, 6, 12]  
    print("Inside function lst =", lst)  
  
lst = [1, 5]  
func2(lst)  
print("Outside function lst =", lst)
```

Inside function `lst = [3, 6, 12]`

Outside function `lst = [1, 5, 100]`
